

# WHAT'S YOUR WATER SCORE?™

If you don't know your Water Score, or if it's not as high as you'd like it to be, Kinetico can help.

Many things affect your Water Score: water hardness, chlorine levels, contaminants, use of a water filter, and so much more. Depending on your current Water Score and where you want it to be, one or more water treatment options may be needed to reach your desired Water Score.

For water that is free from impurities, works better with your plumbing and water-using appliances, keeps hair and skin soft and smooth, cleans effectively without causing stains and spots, tastes great, saves you money, and is better for you and your home, you need to raise your Water Score.

**Experience life with a higher Water Score today!**

## Options to improve your Water Score

Your water issues will determine what treatment options may be needed to improve your Water Score. Your Kinetico water treatment professional will recommend the solution that fits your water, your needs and your budget.

## SEE THE DIFFERENCE

### Prefilter Cartridge and Whole Home Filters

Prefiltration offers frontline defense against large particles, sediment, iron, dirt, odor-causing impurities, chlorine and other suspended solids. Kinetico whole-home systems employ different types of filters, depending on your water's overall condition.

## FEEL THE DIFFERENCE

### Water Softeners

- Reduce calcium and magnesium for luxuriously conditioned water.
- Kinetico whole-home systems are non-electric, so there are no electric parts to fail.
- Twin or quad tank design ensures a 24/7 supply of soft water without disruption. When one tank is exhausted, the other tank automatically switches into service.

## TASTE THE DIFFERENCE

### Drinking Water Systems

Significantly reduce impurities from water for clean, clear, great-tasting drinking water right from the tap. Kinetico state-of-the-art systems produce high quality water with a strong flow from the faucet.
